

## About Me

My name is Silvia Langton. I'm originally from Buenos Aires, Argentina. I'm a mother of five wonderful kids, a linguist, coder, dog groomer and pursuing a Bachelor in computer science at UVU. I worked previously as a retail manager for 16 years. As a manager I acquired fundamental skills that will help me in a future career. I consider myself a hard worker, and very detail oriented. I'm passionate about learning new things, so any opportunity that comes to me I take it. My hobbies include playing musical instruments, cooking, and playing soccer along with supporting my kids's soccer activities too. I am excited for this new tech career path in my life and the opportunity I have to show my kids that you can achieve your goals if you work really hard for it.
